

FIBROUS FEED

The Unicarli fibrous feed line contains complete rations (unifeed-TMR) formulated to meet the feeding needs of the animals, depending on the physiological phase. They are composed of forages from our own production and a careful selection of zootechnical raw materials.

Recommended for ruminants in the phase of:

growth
dry
lactation

Unicarli advantages:

-  Management simplicity
-  Higher welfare and productivity
-  No stockpiling of raw materials
-  No purchase costs for mixer wagon
-  Savings on diesel and equipment maintenance
-  More free time at disposal

Versatile Unifeed for cutting-edge breeding

Gruppo Carli fibrous feeds are nutritious for animals and easy to use for breeders.
